

bennington potters

from our hands to yours

From our hands to yours

Bennington design starts with ideas: make a pie pan that provides the good heat and good looks of stoneware to our favorite cheat — the store bought piecrust. Make it pay homage to the traditional pie pan. Make it shout out that food preparation is at the heart of all things good. As we refine the design, it becomes more useful and more beautiful. As you use our pottery, because it works so well and gives such pleasure, you find uses. Thus, in your hands, a piece becomes multipurpose.

From hand to hand, it's Bennington.

Beautiful Bennington

works hard in the kitchen

At Bennington the essential design happens through the hands. Yes, we do drawings, work with concepts. But, it is as we make one — the first one — that the conversation of heart, hand, eye and mind accomplishes the work of design. You feel this reality when you use this, our homage to the traditional New England batter bowl.

Discover Tavernware

Picture wooden tables, metal tankards and platters, the flickering firelight of the Catamount Tavern of Bennington's colonial past. Our tribute to this past is Tavernware.

The warm tawny glaze, hand rubbed in spots, reveals highlights of a deep mahogany clay body, suggesting the soft worn appeal of antique treasures.

Unlike pewter and tin, like all Bennington, Tavernware is vitrified stoneware, meaning it won't absorb or leach anything.

Black and White. Always Classic.

Black on Slate. We love it paired with its best companion White on White. These two agates work the same subtle glazing strategy — same color, two tones, one shiny, one matte — for a marbling effect that is both subtle and bold.
